			DATE:	

All artwork must be inside outline.
Outline does not print.

8.5" x 2"
8 1/2" x 2"

12-14oz

We are free of any claim for infringement including, but not limited to, all patent, copyright, trademark, service mark, intellectual property, proprietary or contractual right and trade secret claims. This proof is only intended for layout, spelling, completeness, and color separation. Every effort will be made to obtain the best possible color reproduction of client data but because of the nature of the processes involved, We shall not be required to guarantee an exact match in color or quality between the customer's photograph, transparency, proof or electronic graphic file and the printed article. All text and logos should be provided in a vector format for best results. Note, point size and line width may need to be enlarged due to the design. We will adjust art to ensure the best print quality. PANTONE (PMS) Coated Colors are used for line work. Therefore, each color must be called out by a specific pantone number. Colors in art submitted must match PMS colors called for. The substrate color will affect the printed ink colors. Dark or colored substrates will greatly change or dull the color of the inks. Special consideration should be given to the color of the product that will be placed inside a clear or transparent container. The product placed in the container will affect the color and sharpness of the printed design. Images on tapered products will blur at the top and bottom of the imprint area. The best print area is in the center of the design (top to bottom). Keep all important art, logos and UPC's near the center of the container. Photos of any printed products may be used on our website and promotional media.
